

HARSHVARDHAN SHINDE

Software Developer | Java & Spring Boot | Backend Engineering

Pune, Maharashtra, India | +91 87703 08351 | harshshinde758@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Software Developer with hands-on experience designing and building scalable RESTful APIs and transaction-based backend systems using Java, Spring Boot, and MySQL, following the Controller–Service–Repository architecture. Strong foundation in data structures, OOP, and clean-code practices, with practical exposure to deploying full-stack applications end-to-end (Render, Vercel), and a fast-learning mindset across the full technology stack..

EDUCATION

B.Tech in Computer Science — Chameli Devi Group of Institutions, Indore, MP, India **2022 – 2026**

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL, JavaScript

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Microservices, RESTful APIs, JPA/Hibernate, FastAPI, Flask, JSP/Servlets

Databases: MySQL, JDBC, Database Design & Normalization, Query Optimization

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), MVC & DAO Design Patterns, Collections Framework

AI / LLM Integration: LangChain, FAISS, Retrieval-Augmented Generation (RAG), LLM Tool-Calling (Groq Llama 3.1, OpenAI), Prompt Engineering, TensorFlow (exposure)

Frontend: React.js, HTML5, CSS3

Tools & Practices: Git/GitHub, Postman, Maven, JUnit (Basics), Agile/Scrum, API Testing & Debugging, CI/CD Fundamentals

PROFESSIONAL EXPERIENCE

Trainee Software Developer — Ypsilon IT Solutions Pvt. Ltd., Indore, India **2025 – 2026**

- Built 10+ RESTful APIs with Spring Boot for core banking operations, handling deposits, withdrawals, and fund transfers with 99%+ accuracy
- Integrated MySQL with JPA/Hibernate, streamlining data persistence across 5+ banking modules.
- Tested and debugged APIs using Postman, resolving 20+ defects and improving backend stability using a Controller–Service–Repository architecture

KEY PROJECTS

AI-Powered Banking Customer Support Agent | [Live Demo](#)

React.js, Spring Boot, MySQL, FastAPI, LangChain, FAISS, Groq LLM (Llama 3.1)

- Architected a full-stack banking platform with an integrated conversational AI assistant capable of executing real banking operations (balance inquiry, fund transfer, ticket management) via secure REST API tool-calling.
- Implemented RAG (FAISS + Sentence Transformers) covering 15+ banking workflows/FAQs, with intent detection for 4+ operations across English, Hindi, and mixed-language queries
- Built multi-step conversational workflows with session management, confirmation handling, and contextual memory for a seamless user experience.
- Implemented fraud-prevention controls (high-value alerts, balance verification, self-transfer restrictions) and an automated support-ticket system covering complaint registration, agent assignment, and escalation.

Healthcare AI System — Full-Stack Chest Disease Prediction Platform | [Live Demo](#)

Next.js, TypeScript, Appwrite, Flask, TensorFlow, OpenCV

- Built a full-stack healthcare platform with role-based dashboards (Patient, Doctor, Admin) supporting secure OTP-based authentication, appointment booking, and medical record management.
- Developed a Flask REST API to serve a TensorFlow CNN model for multi-class chest X-ray classification (COVID-19, Tuberculosis, Pneumonia, Normal).
- Integrated Grad-CAM explainability to visualize decision regions, improving interpretability of AI predictions in a clinical context.
